

Python Programming Assessment

TOPIC: STRING ITERATION & IMMUTABILITY (GROUP 3)

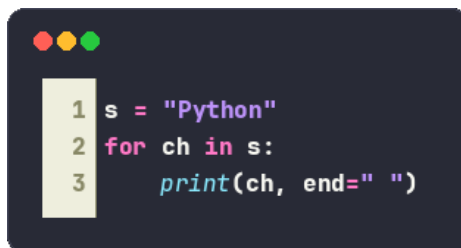

Instructions:

1. This assessment contains 20 Multiple Choice Questions covering string iteration (for, while, enumerate, in) and immutability.
2. Read each question carefully and select the single best option.
3. No answers are provided in this question booklet. Write down your options on a separate answer sheet.

Q1. Which loop is most commonly used to iterate through a string?

- A) while B) for
C) do-while D) switch

Q2. What will be the output?

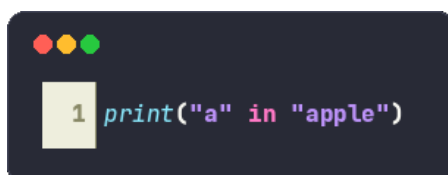

```
1 s = "Python"
2 for ch in s:
3     print(ch, end=" ")
```

- A) Python B) P y t h o n
C) Error D) None

Q3. Which operator checks membership in a string?

- A) == B) is
C) in D) not

Q4. What will be the output?

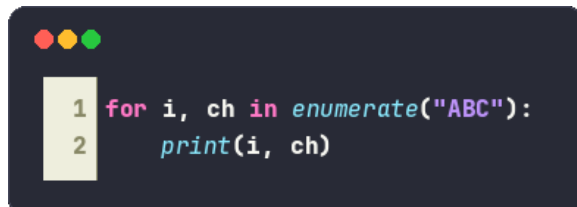

```
1 print("a" in "apple")
```

- A) False B) Error
C) True D) None

Q5. Which function returns both index and value while iterating?

- A) range() B) index()
C) enumerate() D) list()

Q6. What is the output?

A code editor window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The code is as follows:

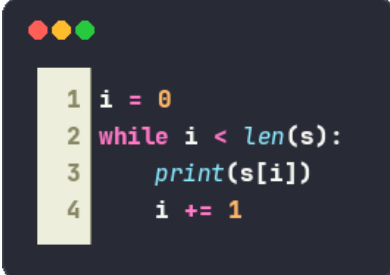

```
1 for i, ch in enumerate("ABC"):
2     print(i, ch)
```

- A) 0 A C) Error
1 B
2 C
B) A 0 D) None
B 1
C 2

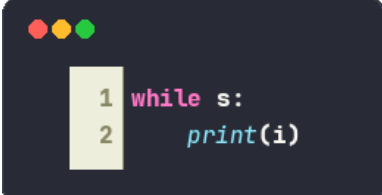

Q7. What is the starting index of enumerate() by default?

- A) 1 B) -1
C) 0 D) Depends on string

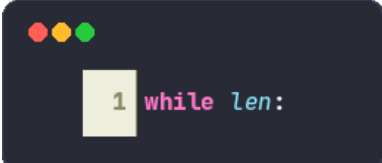

Q8. Which of the following is a valid while loop for string iteration?

A) A code editor window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The code is as follows:

```
1 i = 0
2 while i < len(s):
3     print(s[i])
4     i += 1
```

B) A code editor window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The code is as follows:

```
1 while s:
2     print(i)
```

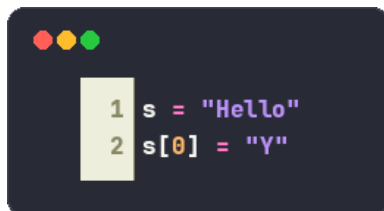

C) A code editor window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The code is as follows:

```
1 while len:
```

D) None

Q9. Strings in Python are:

- A) Mutable
- B) Dynamic
- C) Immutable
- D) Static

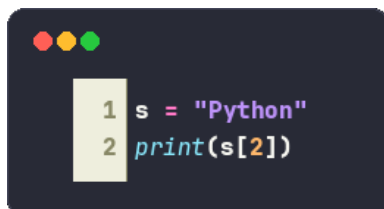

Q10. What will happen?

```
1 s = "Hello"
2 s[0] = "Y"
```

- A) Hello
- B) Yello
- C) TypeError
- D) SyntaxError

Q11. To change a string, we need to:

- A) Modify directly
- B) Create a new string
- C) Use append()
- D) Use pop()

Q12. What is the output?

```
1 s = "Python"
2 print(s[2])
```

- A) P
- B) t
- C) y
- D) h

Q13. Which statement is TRUE about strings?

- A) They can be modified character by character.
- B) They are immutable.
- C) They support pop().
- D) They support remove().

Q14. What will be the output?

```
1 s = "Code"
2 for i in range(len(s)):
3     print(s[i], end="")
```

- A) Error
- B) Code
- C) C o d e
- D) None

Q15. Which function is mainly used when both index and value are required?

- A) len()
- B) type()
- C) enumerate()
- D) input()

Q16. What will be the output?

```
1 print("z" in "python")
```

- A) True
- B) False
- C) Error
- D) None

Q17. Which keyword is used for membership testing?

- A) is
- B) in
- C) and
- D) as

Q18. What will be the output?

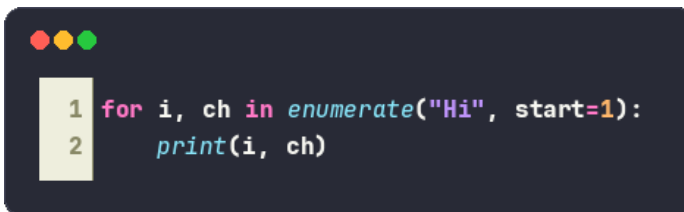

```
1 s = "ABC"
2 i = 0
3 while i < len(s):
4     print(s[i], end="")
5     i += 1
```

- A) ABC
- B) A B C
- C) Error
- D) Infinite Loop

Q19. Which of the following demonstrates string immutability?

- A) `s[0] = 'A'`
- B) `s = 'A' + s[1:]`
- C) `s.append('A')`
- D) `s.pop()`

Q20. What is the output?

```
1 for i, ch in enumerate("Hi", start=1):  
2     print(i, ch)
```

- A) 1 H
2 i
- B) 0 H
1 i
- C) H 1
i 2
- D) Error
