

Tuple and NamedTuple MCQ Practice (20 Questions)

1.

```
t = (1,2,[3,4])  
t[2].append(5)  
print(t)
```

- A) (1,2,[3,4])
- B) (1,2,[3,4,5])
- C) TypeError
- D) AttributeError

2.

```
t=(10,20,30,40)  
a,*b,c=t
```

Output?

- A) 10 (20,30) 40
- B) 10 [20,30] 40
- C) 10 20 40
- D) Error

3.

```
t=(1)  
type(t)?
```

- A) tuple
- B) list
- C) int
- D) Error

4.

```
t=(1,)  
type(t)?
```

- A) tuple
- B) int
- C) list
- D) NoneType

5.

```
t=(1,2,3,4,5)
```

first,*middle,last=t

middle?

- A) (2,3,4)
- B) [2,3,4]
- C) 2,3,4
- D) Error

6.

nums=(1,2,3,4,5)

nums[::-2]

- A) (1,3,5)
- B) (5,3,1)
- C) (4,2)
- D) Error

7. Tuple packing means?

- A) Compress tuple
- B) Convert list
- C) Automatically create tuple from values
- D) Encrypt tuple

8.

a=10,20,30

type(a)?

- A) list
- B) tuple
- C) int
- D) Error

9.

(1,2)+(3,4)

- A) (1,2,3,4)
- B) (1,2,(3,4))
- C) list
- D) Error

10.

t=([1,2],[3,4])

```
t[0].append(10)
```

Output?

NamedTuple Section

11.

```
Student=namedtuple("Student",["name","age"])
```

```
s=Student("Ram",20)
```

s.name?

A) Ram

B) name

C) Error

12.

```
p.x=50 in namedtuple
```

A) Change value

B) AttributeError

C) TypeError

13.

```
User=namedtuple("Account",["id"])
```

User.__name__ ?

A) User

B) Account

14.

Student._fields returns?

A) list

B) tuple

15.

_replace() changes original?

A) Yes

B) No creates new object

16.

namedtuple object indexing possible?

A) Yes

B) No

17.

type(namedtuple object)?

A) generated class

B) list

18.

Can namedtuple unpack?

A) Yes

B) No

19.

Namedtuple is:

A) mutable

B) immutable

20.

Namedtuple inherits behavior of:

A) tuple

B) list
